

## Aerial Work Platform

Aerial Work Platforms - There are many accessories meant for lift trucks which can be utilized to be able to help expand the functionality of your forklift and allow you to lift stuff, handle materials with less effort or to accomplish clean-up tasks.

A lot of the accessories are particularly designed in order to fit on the forks themselves. Blade extensions for instance, are used if you need a lot more blade length, which increases lifting capability. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded attachments are another variety used when transferring rolled material so as to make certain it does not roll off of the traditional flat forks.

Lifting accessories can be pivoting and telescoping crane accessories. They come in numerous styles. These accessories are normally used for transporting lumber, metal bars, poles or whichever sort of bulky items. Additional attachments like different styles of hook plates and hooks are offered to carry stuff with a sling or chain. Magnetic lifters and slab lifters are other stuff that could be utilized together with hook attachments. Slab lifters are specialized accessories which are utilized for lifting different materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your forklift to make transferring rolls of carpet a lot easier. The accessory connects onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are various types of forklift attachment designed for facility maintenance such as snow blades. These industrial forks can be connected to front end loaders and designed for transferring materials such as mulch, snow as well as dirt. Other common cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the forklift blades connect onto for sweeping big spaces like factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for example. Sweepers have widths up to 60 inches and this surface area makes clean up quick and effortless.

Material spreaders are other accessories used on lift trucks. These spreaders are handy for various applications such as spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory that lots of businesses utilize day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models presented which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location with the use of the lift truck. Larger platform models have additional space for staff in order to bring tools and other essential items for the job. Often work platforms are made of poly material or steel.
