

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Newly retired, after spending several years working with his brother to develop their crane business into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

All through their journey, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could quickly and safely elevate individuals in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they created and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into current models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into various markets worldwide and develops new products to ensure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
